Dumping Procedure Checklist

- Wear the protective rubberized gloves provided
- Remove and extend the dump hose with the clear plastic main valve adapter on one end
- Remove the white 5 gal. bucket for use as a stool
- Remove the protective cap from the coach’s dump port
- Attach the clear plastic adapter end of the hose to the dump port with the valve handle vertical
- Ensure that the main valve is closed, handle down, and that the small flush hose valve is closed
- Place the exhaust end of the dump hose into the sewage opening and secure
- Recheck all connections carefully
- Open black tank dump valve – (right side handle)
- Open main dump valve on the clear plastic adapter – (center, on clear plastic adapter)
- When black tank is empty, close the main dump valve only
- Open the grey tank dump valve, (left side handle) allowing the grey water to flush into the black tank
- When tanks are equalized as evidenced by no more grey water flow, close the grey tank valve
- Open the main valve to empty the flush water from the black tank
- Repeat steps 11 through 14 at least twice more to thoroughly flush the black tank
- Close the black tank valve
- Open the grey tank valve to drain the remaining grey water
- When the grey tank is empty, close the grey tank valve
- Remove the clear plastic main valve fitting from the coach’s dump port
- Do not close the main valve on the clear plastic adapter as you are going to flush the hose out
- Reinstall the protective cap onto the coach’s dump port
- Flush out the dump hose with the pressure water provided
- Drain all residual water out of the dump hose
- Compress the extended dump hose and replace into compartment as found
- Replace the 5 gal. bucket into the compartment as found
- Clean up any mess created
- Replace the protective rubberized gloves into the compartment
- Close compartment door and ensure latching
- Add deodorizer and 1 gal. water to the black tank through the toilet
- Add deodorizer and 1 gal. water to the grey tank through any sink
